HYPOSTATIZE HEALTH FOR ALL

Presented by Saieesh Vinod and Yap Zheng Wei
Introduction to SDGs
Sanitation and Hygiene in ASEAN
Importance of Sanitation and Hygiene
Nutrition in ASEAN
Importance of Nutrition
Our Recommendations
Chosen Social Development Goals

3. **Good Health and Well-being**

Aims to reduce maternal mortality and preventable death of newborns

11. **Sustainable Cities and Communities**

Aims to upgraded slums and ensure access to basic services globally
Sanitation and Hygiene in ASEAN

8 OUT OF 10 COUNTRIES
where less than 100% of the population have access to basic sanitation services

7 OUT OF 10 COUNTRIES
where more than 1000 deaths occur due to poor WASH services every year

2 OUT OF 10 COUNTRIES
where the mortality rate attributed to lack of WASH services exceeds 10% every year
IMPACT OF SANITATION ON OPEN DEFEcation

49% Population with access to basic sanitation

- 40.57%
- 12.45%
- 5.74%
- 3.85%
- 2.60%
- 0.35%
HIGH CHILD MORALITY

Diarrhoeal Diseases are a leading cause of child mortality and it often stems from WASH services and open defecation.
THE UNDERNOURISHMENT PROBLEM IN ASEAN

5 OUT OF 10 ASEAN COUNTRIES EXCEED THE GLOBAL AVERAGE FOR UNDERNOURISHMENT

- Represents 5% of the population being undernourished
All the countries that had an above average undernourishment rate also had below average healthcare expenditure.
RECOMMENDATION #1: INCREASE GOVERNMENT EXPENDITURE ON HEALTHCARE

AN EFFECTIVE SOLUTION

Over the years Brazil has been gradually increasing its healthcare expenditure to meet the needs of citizens. In the same period there is also a notable increase in the life expectancy and decrease in infant mortality.
IMPORTANCE OF HEALTHCARE EXPENDITURES

Increased healthcare expenditure will give citizens access to vaccines for preventable diseases like measles.

Medical facilities such as hospitals can also be constructed using increased expenditure.
RECOMMENDATION #2: SMART TOILETS

A LOW-MAINTENANCE SOLUTION

The smart toilets that were rolled out in India are programmed to flush and automatically clean itself according to the usage but at $7000 they are expensive.

EFFECTIVE FINANCING:

The toilets placed in urban areas can be financed using mobile applications allowing free-to-use units to be placed in impoverished areas.
RECMMENDATION #3
ONLINE MEDIA CAMPAIGNS TO RAISE MONEY AND DONATIONS

Based on the giving report, online media channels were the most effective mediums to raise money and donations for charities. Online media campaigns can be leveraged to get more donations for impoverished regions where increase healthcare expenditure is not a viable option.
